PROJECTS

BCA Student Performance Dashboard | *Microsoft Excel*

- Built an interactive Excel dashboard analyzing student academic performance across semesters using Pivot Tables, Charts, and Slicers.
- Cleaned and transformed raw student data and generated topper analysis and pass/fail insights.

College Database Management System | *SQL*

- Designed a relational database with structured tables, relationships, and constraints in MySQL.
- Wrote queries using Joins, Aggregate Functions, Subqueries, and CTEs to generate student and course reports.

Global Superstore Dashboard | *Power BI*

- Developed an interactive Power BI dashboard analyzing business performance using DAX measures, calculated columns, and KPI cards.
- Designed visual reports tracking key indicators to support data-driven decision-making.

EV Vehicles Analysis Dashboard | *Tableau*

- Built an interactive Tableau dashboard analyzing EV market trends, model performance, and state-wise distribution.
- Used charts, filters, and KPIs to identify patterns and present clear visual insights.

ACHIEVEMENTS

- Solved 250+ SQL problems on HackerRank, LeetCode, CodeChef, and W3Schools.
- Developed 4+ end-to-end Data Analytics projects using Excel, SQL, Power BI, Tableau, and Python.
- Built interactive dashboards for business reporting and decision-making.
